Subject:

Monty,

As promised here is the contract with the additional provisions based on Council's request that the contract include performance measures as well as other protections. The contract provisions do not add additional cost on Inland but provides protection to the City in the event Inland does not perform. Based on your concern with the initiative action, we included the additional provision providing protection to Inland in case of a successful initiative action. That provision is found on page 2 of the document. We also noted in the contract where we took language from the GA contract and incorporated the language into this contract.
